**Do you have to practice a
cybersecurity process?**

**Let's rethink how cybersecurity
exercises are built and delivered.**

INJECT

Tabletop Exercises (TTX)

Communication

Cooperation

Coordination

Preparedness

Gaps identification

Current TTX

On site

Injects - on paper, office applications

Linear progression

Limited options for evaluation

It is an experience

A professional networking event in a wood-paneled room. In the foreground, two men in business suits are smiling and talking while holding plates of food. In the background, other people are engaged in conversations. A table in the lower right is set with a white tablecloth, orange juice, croissants, and small pastries.

Expensive networking/PR

Current TTX

- On site
- Injects - on paper, office apps
- Linear progression
- Limited options for evaluation
- It is an experience

INJECT TTX

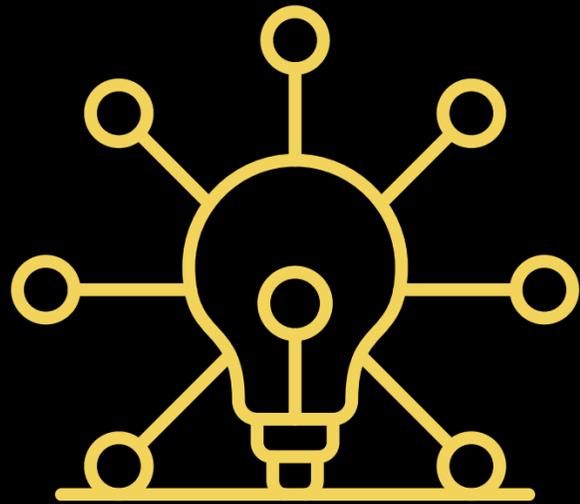

- On site & also remote
- Complex approach
- Adaptability
- Semi-Automated Evaluation
- The same or better

The INJECT Exercise Platform significantly streamlines the preparation and execution of exercises.

It delivers a substantial improvement in participants' learning experience — achieving outcomes that traditional approaches cannot match.

Exercise Formats

Micro

- Short, focused sessions
- Designed for user awareness
- Practical skills training
- Ideal for individual participants

Discussion

- Focused on a specific topic
- Useful for identifying gaps and weaknesses
- Supports improving communication
- For managers and leadership teams

Simulations

- Application of real processes and policies
- Most realistic exercise format
- Enables comprehensive team-based training

What exactly does the platform offer
when I'm an exercise participant?

INJECT

Easy to use website app, no installation

Challenging and engaging scenarios

Personalized feedback

What exactly does the platform offer
when I'm an exercise instructor?

INJECT

Most of the work is automated by the platform

Seeing everything a trainee does

Simplified exercise management

What exactly does the platform offer
when I'm preparing an exercise?

INJECT

Control over my trainees and my content

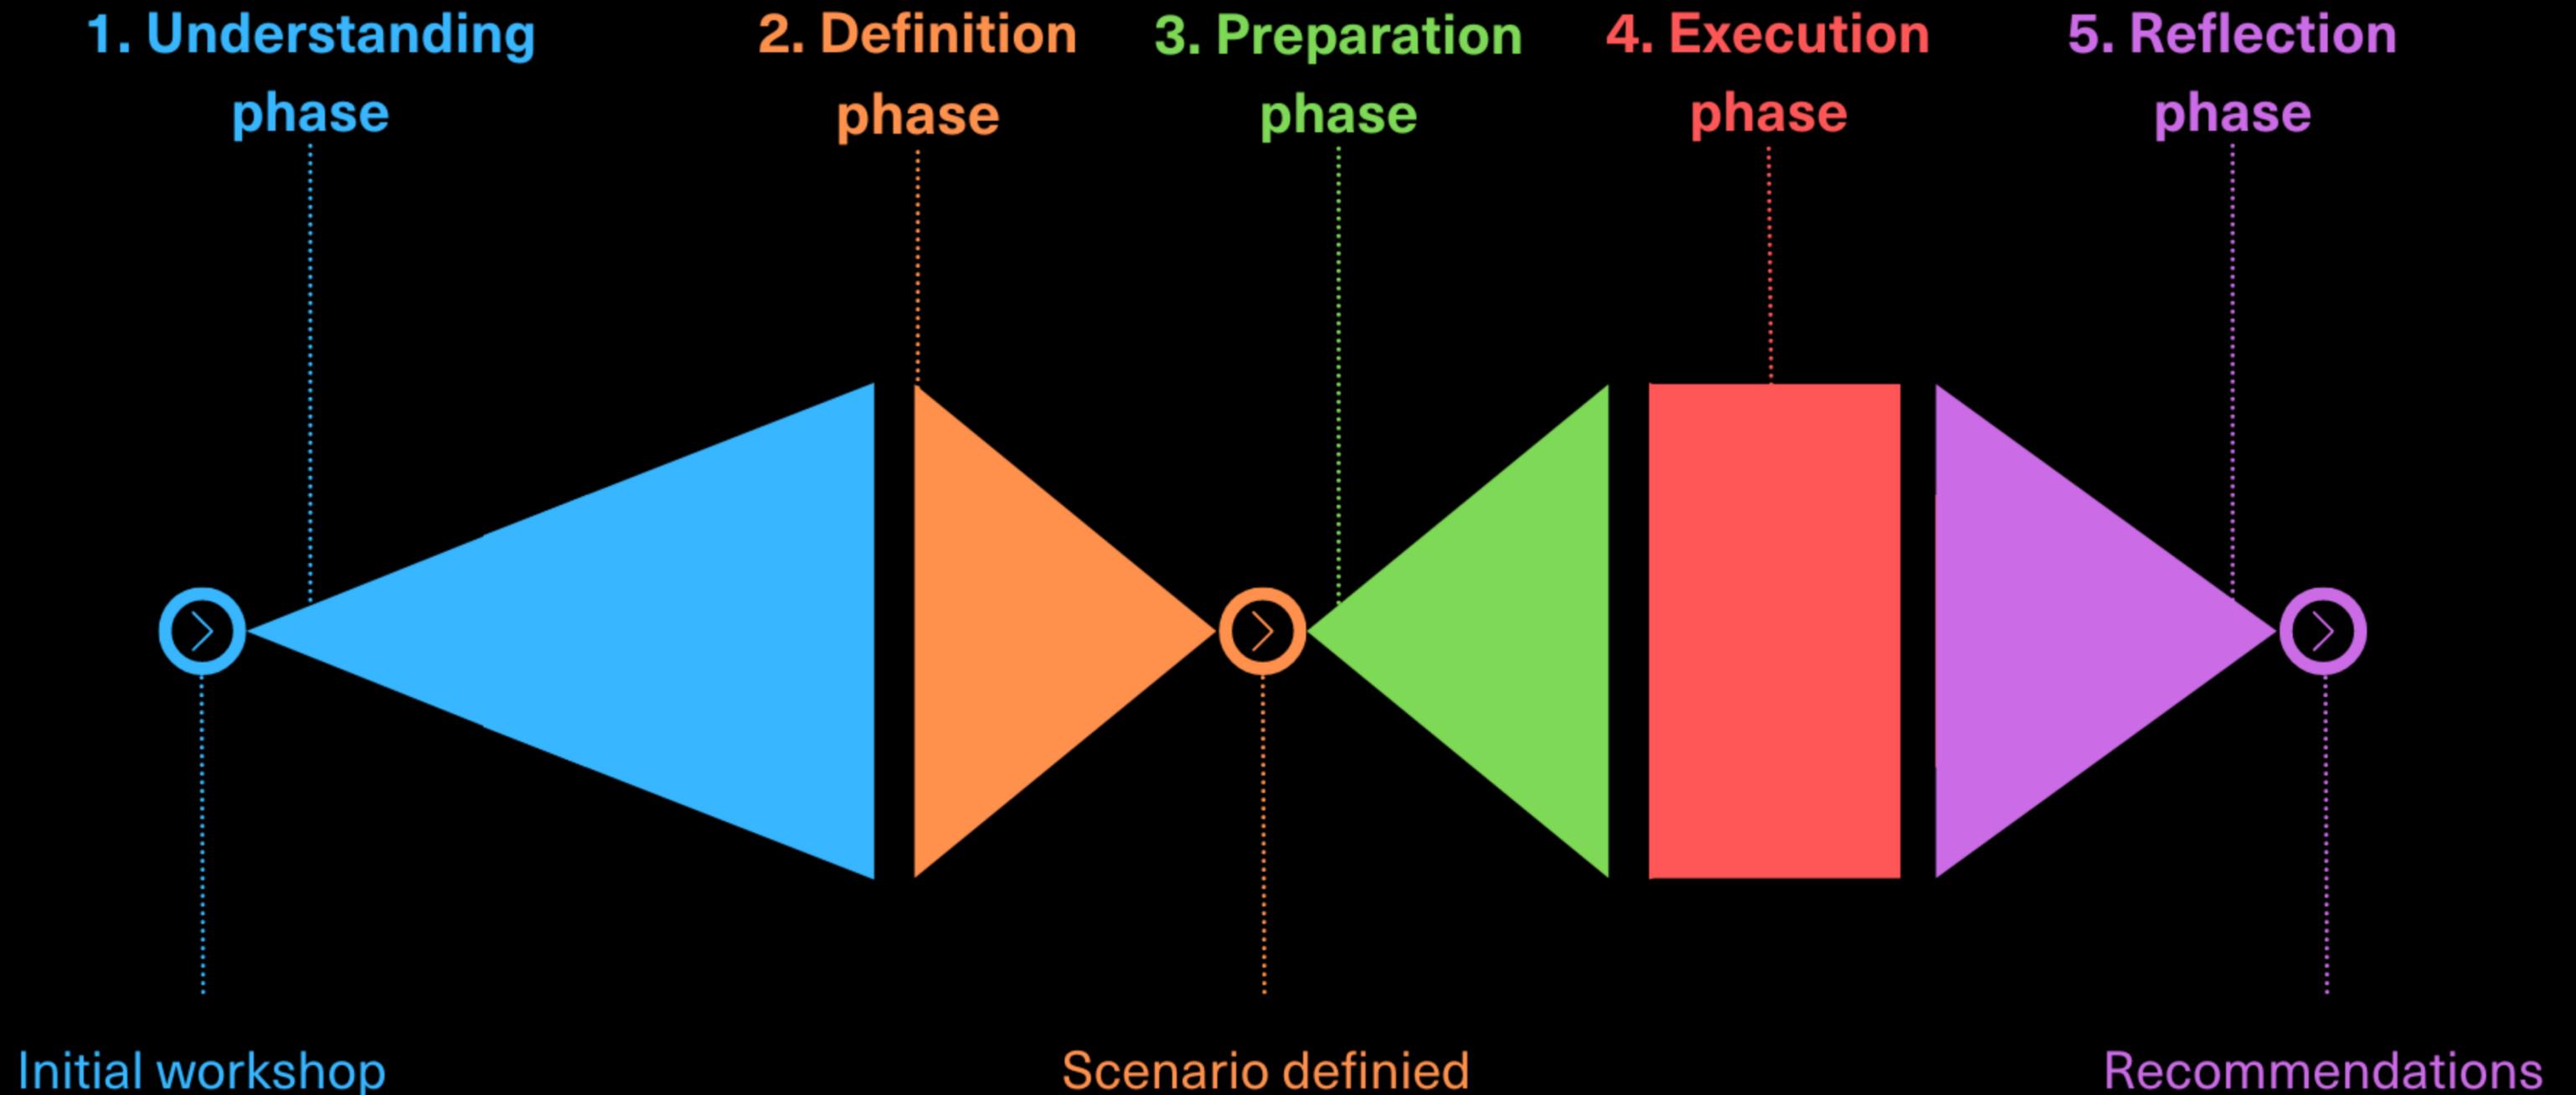

Reuse and improvements of my scenarios

From process-technical TTX to high-level policy

How do you prepare an exercise using the INJECT process?

What exactly does the platform offer
when I'm doing exercise evaluation?

INJECT

Data collection

Analysis tools and methods

Machine learning

Example Use Case: Phishing Incident Response Simulation

- Under-2-hour exercise for teams of three junior incident handlers.
- Email communication and simulated tooling (browser analysis, IP blocking, log searches).
- Instructors' role-play key external actors: website operator, victims, users, IT admins, and the data protection officer.
- Used in teaching at the FI MU; scenario available for download.

Greetings,
could you please investigate what happened at our website? I can see only a folder with some files (see attachment) instead of our web presentation: <https://nice-project.uni.ex/>
Thanks a lot!

Need to use the tools – Output of the simulated browser tool.

The image shows a webmail login interface. At the top, there is a large orange banner with the word "Webmail" in white, italicized font. Below the banner, there are two logos: "horde" with a green gear icon and "roundcube" with a blue cube icon. Underneath the logos, the text "Account Settings" is centered. Below this, there are two input fields: "Email" and "Password". At the bottom, there is a prominent blue button labeled "Login".

INJECT EXERCISE PLATFORM DOCUMENTATION

Welcome to the INJECT Exercise Platform Documentation portal! Here, you'll find comprehensive resources to guide you through every aspect of the INJECT Exercise Platform, from installation to advanced usage.

OVERVIEW

The INJECT Exercise Platform revolutionizes tabletop exercise management by providing a versatile and intuitive solution for organizations of all sizes. Whether you're a small team looking to improve emergency response protocols or a large corporation conducting complex training scenarios, INJECT Exercise Platform offers the flexibility and power to meet your needs.

TECHNICAL DOCUMENTATION

Explore the technical documentation to gain a deeper understanding of the platform's architecture, APIs, security measures, and installation procedures.

- **Installation Guide:** Step-by-step instructions for deploying INJECT Exercise Platform using Docker Compose and Nginx.
- **Security:** Details on the security measures and practices implemented in the INJECT
